Dear Valued Customer,

With our continuing efforts to make improvements to our products, we have made a minor change in the construction of our cabinets. In order to minimize damage caused in transit, we are no longer attaching the L part of our cabinet brackets. Please see photo below.

The flat part of the clip will still be mounted to the cabinet as we have done in the past.

When assembling the cabinet insert the L clip into the flat part of the clip and install the screws provided into the pre drilled holes.

This minor change should prevent many of the damages that we have had in the past caused by the L part of the clip scratching the cabinet in transit.

Feel free to call us with any questions.

Best Regards,

The Entire International Kitchen Supply Team
