

Rollout Trays

*On railing wheels go to the back.

* If using long screws for extra support, predrill on front and back pieces near center groove.

Left

Right

1. Lay right side on table. Outside edge against table.
2. Insert front and back pieces

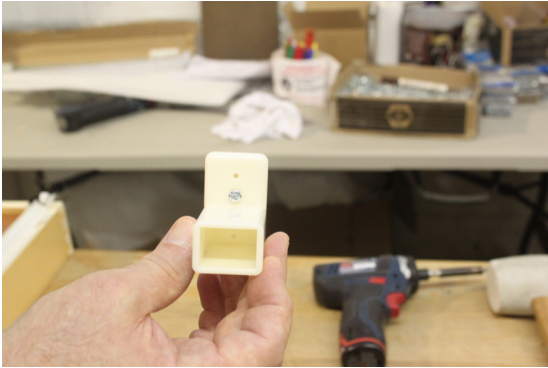

3. Slide bottom into place

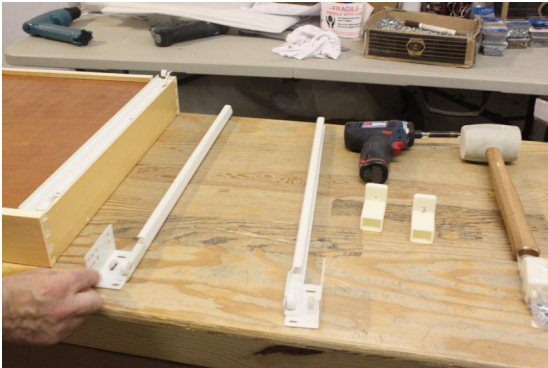

4. Remove glide from left piece before putting into place. Reattach glide once the left side is in place.

5. Insert "Boots" into slots in back of cabinet. Place screw in each one.

6. Place glide inside boot. Attach front of glide frame to wall of cabinet.

7. Insert drawer.
